

Laying Out the 34.92 Degree Sector

As an aid in marking and checking the 34.92 degree sector lines, the table below may be used (for greater accuracy, use the longest distance your field will allow and work toward the circle in laying out your marks for line B). In this table, **A** indicates the distance from the center point of the circle to a point on each of the two sector lines and **B** indicates the distance between those two points. A **metric measurement** will make it more accurate.

A (meters)	B (meters)
5	3.00
10	6.00
15	9.00
20	12.00
25	15.00
50	30.00
75	45.00
100	60.00
